COVID-19 SKLONIŠTE – BEZBJEDNOST NA PRVOM MJESTU

Pandemija je podstakla privredu da razmisli o odgovarajućim konceptima poslovanja koji omogućavaju zdravlje, bezbjednost i kontinuitet poslovanja.

Kao odgovor na izazove koje je virus COVID-19 postavio, svjetska organizacija za sertifikaciju QCERT razvila je šemu sertifikacije Sistema upravljanja higijenom i bezbjednošću - COVID-19 sklonište – Bezbjednost na prvom mjestu (COVID-19 shelter - Safety first - Hygiene and safety management system).

Sertifikacija prema ovom standardu pruža korisnicima sigurnost da su prakse koje se primjenjuju adekvatne i obezbjeđuje najviši mogući

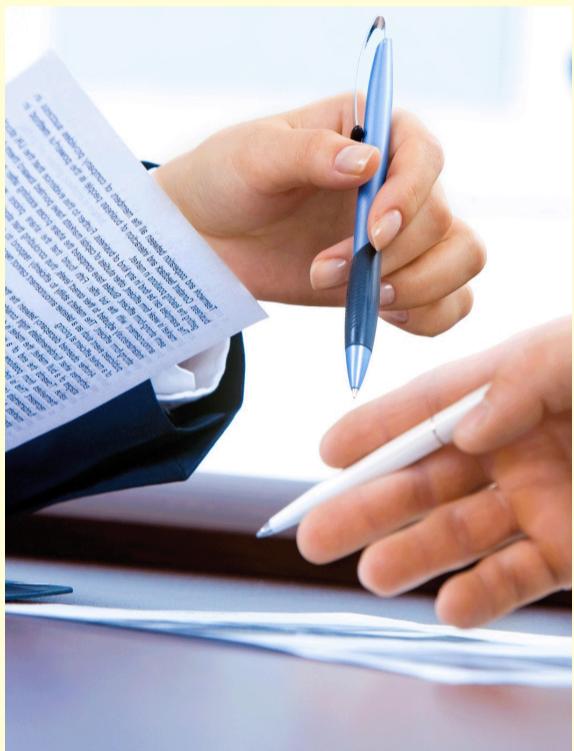

nivo sigurnosti za organizacije, zaposlene i korisnike, kao i konkurenčku prednost na tržištu.

SISTEM UPRAVLJANJA HIGIJENOM I BEZBJEDNOŠĆU

Sistem dokumentuje higijenske mjere i aktivnosti, kao i druge prakse koje se primjenjuju u cilju minimizacije rizika od COVID-19. Pored univerzalnih zahtjeva koji su isti za svako podneblje, standard obuhvata zahtjeve koji proizilaze iz zakona, pravilnika i uredbi, pa se tako obezbjeđuje i usklađenost za domicilnom zakonskom regulativom.

Sistem upravljanja higijenom i bezbjednošću može se postaviti i sertifikovati pojedinačno, ali se takođe može implementirati kao dio integrisanog sistema upravljanja zajedno sa postojećim sistemima upravljanja (zbog svoje strukture koja je usklađena sa ISO standardima).

Kome je namijenjen?

Ciljna grupa za COVID-19 shelter - Safety first - Hygiene and safety management system su organizacije i pojedinci koji pružaju sledeće usluge:

- Turistički smještaj (hoteli, pansioni, hosteli i drugi smještajni kapaciteti);
- Restorani, kafići, barovi i noćni klubovi;
- Organizacija događaja, seminara i slično (event management);
- Wellness i SPA centri;
- Sportski sadržaji;
- Maloprodaja (npr. supermarketi, tržni centri i drugo)
- Transport ljudi i robe;
- Obrazovni centri i škole;
- Javni servisi;
- Slično.

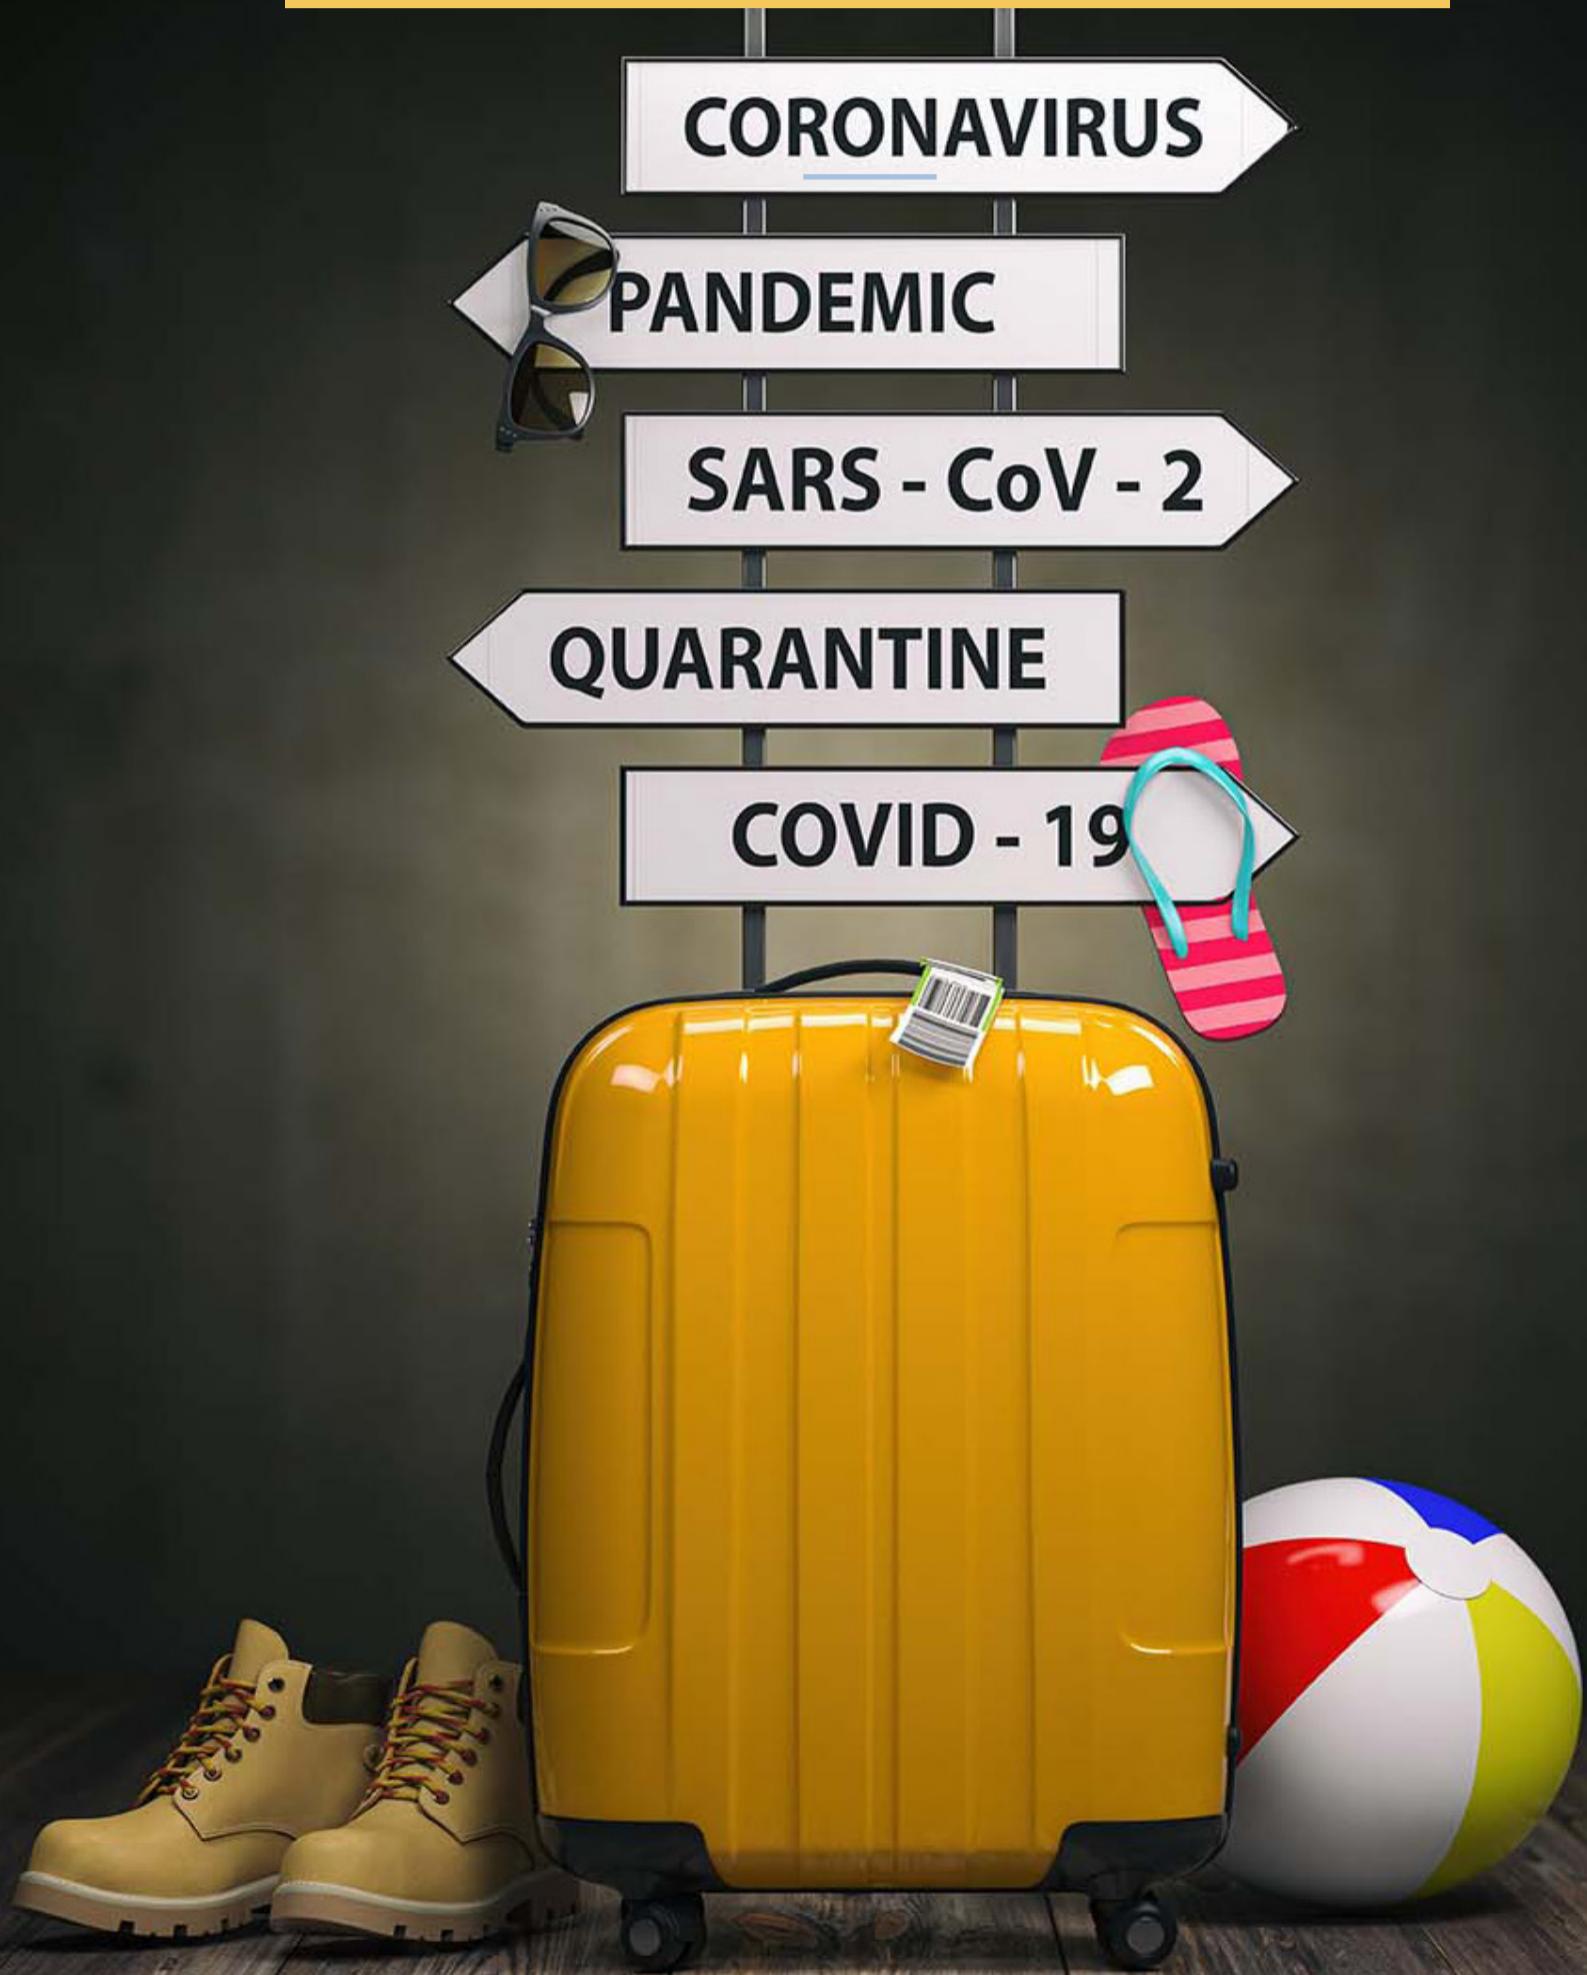

Sertifikacija

Sertifikacija se sprovodi na licu mjesta ili putem on-line provjere pri čemu se pregleda dokumentacija koja služi kao dokaz da se primjenjuju adekvatne higijenske i sigurnosne mjere.

Nakon okončane sertifikacije, korisnik dobija sertifikat koji je validan godinu dana od dana provjere i priznat je u cijelom svijetu.

Sertifikaciju sprovodi međunarodno sertifikaciono tijelo, akreditovano od strane Američkog akreditacionog tela ASIC Accreditation services international commission.

COVID-19 SHELTER - SAFETY FIRST

The pandemic has encouraged the economy to think about appropriate business concepts that enable health, safety and business continuity. In response to the challenges posed by the COVID-19 virus, the world certification organization QCERT has developed a system for certification of Hygiene and Safety Management System - COVID-19 Shelter - Safety First.

Certification according to this standard provides users with certainty that the practices that apply are adequate and provide the highest possible level of security for organizations, employees and users, as well as a competitive advantage in the market.

The system documents hygiene measures and activities, as well as other practices applied to minimize COVID-19 risk. In addition to universal requirements that are the same for each country, the standard includes requirements arising from laws and regulations, thus ensur-

Hygiene and Safety Management System

ing compliance with domestic legislation.

The hygiene and safety management system can be set up and certified individually, but it can also be implemented as part of an integrated management system together with existing management systems (due to its structure that is in line with ISO standards).

WHO'S IT FOR?

The target group for COVID-19 shelter - Safety first - Hygiene and safety management system are organizations and individuals providing the following services:

- Tourist accommodation (hotels, guest houses, hostels and other accommodation facilities);
 - Restaurants, cafés, bars and nightclubs;
 - Organization of all type of events and seminars;
 - Wellness and SPA centers;
 - Sports facilities;
 - Retail (e.g. supermarkets, shopping malls and more)
 - Transport of people and goods;
 - Education centers and schools;
 - Public services and
 - Similar services.

It is created for
organizations and
individuals providing
services

Certification

Certification is carried out on site or through online verification where documentation, that serves as proof that adequate hygiene and safety measures are being implemented, is reviewed.

After the certification is completed, the user receives a certificate that is valid for one year from the day of issuance and it is recognized worldwide.

Certification is carried out by an international certification body, accredited by the US Accreditation Services International
